Performance data quoted represents past performance and is no guarantee of future results. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Returns less than one year are not annualized. Returns for the Fund would have been lower if the management fee had not been waived. NAV prices are used to calculate market price performance prior to the date when the Fund first traded on the NASDAQ. Market performance is determined using the bid/ask midpoint at 4:00 p.m. Eastern Time, when the NAV is typically calculated. Market performance does not represent the returns you would receive if you traded shares at other times. This material must be preceded or accompanied by a [Prospectus](#). Carefully consider the Fund's investment objectives risk factors, charges and expenses before investing. Please read the prospectus before investing.

The Fund is not suitable for all investors. The investment program of the funds is speculative, entails substantial risks and include asset classes and investment techniques not employed by most ETFs and mutual funds. Investments in the ETFs are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund is designed to be utilized only by knowledgeable investors who understand the potential consequences of seeking daily inverse (-2X) investment results, understand the risks associated with the use of inverse exposure and are willing to monitor their portfolios frequently. For periods longer than a single day, the Fund will lose money if the Underlying Stocks's performance is flat, and it is possible that the Fund will lose money even if the Underlying Stock's performance decreases over a period longer than a single day. An investor could lose the full principal value of his/her investment within a single day.

The Fund seeks daily leveraged investment results and are intended to be used as short-term trading vehicles. This Fund attempts to provide daily investment results that correspond to the respective inverse of the performance of its underlying stock (an Inverse Fund).

Investors should note that the fund pursues daily leveraged investment objectives, which means that the fund is riskier than alternatives that do not use the fund magnifies the performance of their underlying security. The volatility of the underlying security may affect a Funds' return as much as, or more than, the return of the underlying security.

Because of daily rebalancing and the compounding of each day's return over time, the return of the Fund for periods longer than a single day will be the result of each day's returns compounded over the period, which will very likely differ from -200% of the return of the Underlying Stock over the same period. The Fund will lose money if the Underlying Stock's performance is flat over time, and as a result of daily rebalancing, the Underlying Stock volatility and the effects of compounding, it is even possible that the Fund will lose money over time while the Underlying Stock's performance decreases over a period longer than a single day.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.

An investment in the Fund involves risk, including the possible loss of principal. The Fund is non-diversified and includes risks associated with the Fund concentrating its investments in a particular industry, sector, or geographic region which can result in increased volatility. The use of derivatives such as futures contracts and swaps are subject to market risks that may cause their price to fluctuate over time. Risks of the Fund include Effects of Compounding and Market Volatility Risk, Inverse Risk, Market Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Other Investment Companies (including ETFs) Risk, and risks specific to the securities of the Underlying Stock and the sector in which it operates. These and other risks can be found in the prospectus.
