

Understanding Counterparty Risk when investing in Collateralised ETPs

It is important to understand counterparty risk before investing in Collateralised ETPs. This document outlines the nature of this risk and how it is mitigated by the provision of collateral.

First, let's look at some of the different entities involved in the Collateralised ETPs and their respective roles:

Issuer of Collateralised ETPs	GraniteShares Financial Plc
Swap Counterparty	Natixis
Swap Collateral Custodian	The Bank of New York Mellon SA/NV
ETP Security Trustee	BNY Mellon Corporate Trustee Services Ltd

The **Issuer** of Collateralised ETPs, GraniteShares Financial Plc, is a public limited company incorporated as a special purpose vehicle (SPV). The Issuer is a standalone entity, ring-fenced from other GraniteShares entities, whose sole purpose is to issue Collateralised ETPs as outlined in the base prospectus, together with any supplements and related documentation. The base prospectus has been approved by the Central Bank of Ireland for the purposes of the Prospectus Directive.

GraniteShares Collateralised ETPs provide exposure to the underlying indices through a swap agreement with Natixis, the **Swap Counterparty**. Natixis is rated A1 (stable) by Moody's as of 25 January 2019. (To view all Natixis's ratings, see https://www.natixis.com/natixis/jcms/ala_5477/en/ratings)

The swap agreement results in counterparty credit risk. To mitigate the risk of counterparty exposure, Natixis is required to ensure that at the end of each business day, collateral assets having a total value at least equal to the value of all outstanding GraniteShares ETPs are posted with the **Swap Collateral Custodian**, the Bank of New York Mellon SA/NV.

What does this mean? For example, if the value of all outstanding GraniteShares ETPs was €150 million, Natixis would be required to ensure that it has posted at least €150 million worth of eligible collateral to the Swap Collateral Custodian.

This collateral is held in one or more segregated accounts. Natixis has granted security over these segregated account(s) in favour of the Issuer in respect of Natixis' obligations under the swap agreement. In effect, the assets held can only be used to meet the Issuer's obligations to investors in the Collateralised ETPs.

The Bank of New York Mellon's role as Swap Collateral Custodian is two-fold:

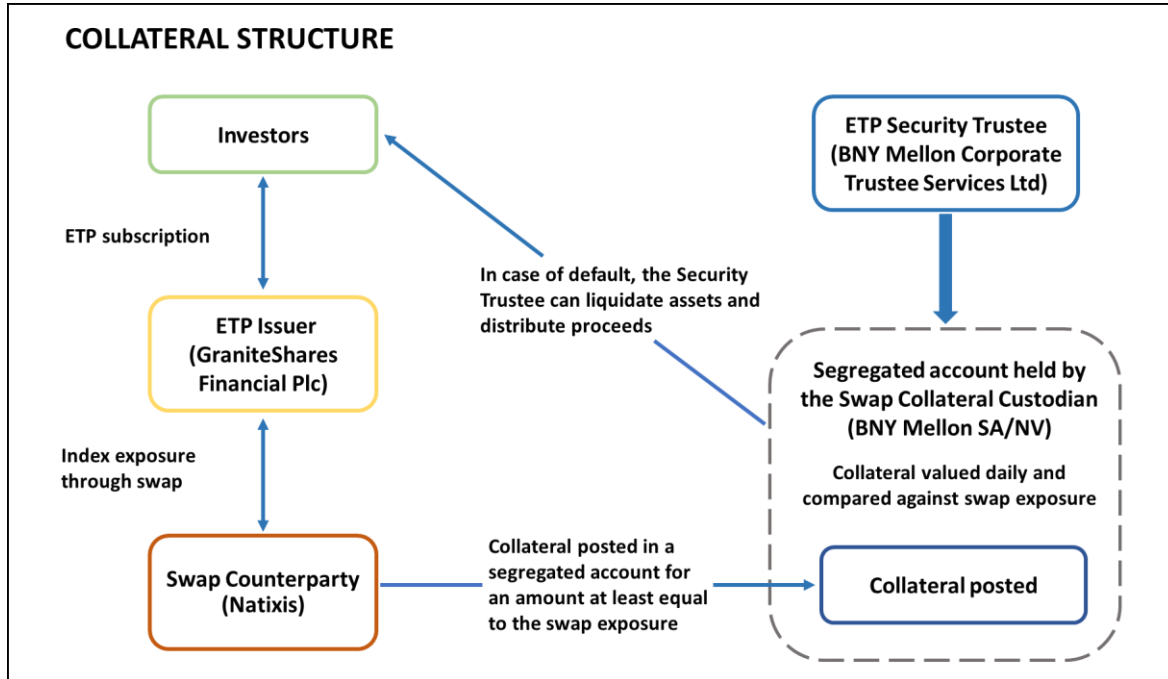

1. Act as custodian by holding and valuing the securities posted by the Swap Counterparty
2. Compare daily the value of securities deposited in the segregated account(s) versus exposure to the Swap Counterparty. In the event of a deficit, it will ask the Swap Counterparty to post additional eligible collateral.

Eligible Collateral

The posted collateral must meet certain set criteria with respect to asset quality, concentration, margin and liquidity as set out in the schedule of Eligible Collateral (see below).

Role of the ETP Security Trustee

In the event of a Swap Counterparty default and non-payment of any corresponding redemption amount under the GraniteShares ETPs, the **ETP Security Trustee**, BNY Mellon Corporate Trustee Services Ltd, would be in a position to enforce the security and to sell the collateral in order to redeem the outstanding GraniteShares ETPs.

Comparing GraniteShares Collateralised ETPs and other similar leveraged products

	GraniteShares Leveraged ETPs	Leveraged certificates	CFDs and Spread Betting
Exchange listed	Yes	Yes	No
Ring-fenced structure	Yes	No	No
Counterparty risk	Yes – but mitigated through collateralisation and ring fencing assets	Yes – no mechanism to mitigate credit risk	Yes – No mechanism to mitigate credit risk
Transparency of collateral holding	Yes – holding posted daily on the website	N/A	N/A

General Notice

For professional clients and eligible counterparties only.

GraniteShares Limited (“**GraniteShares**”) (FRN: 798443) is an appointed representative of Duff & Phelps Securities Ltd. (FRN: 466588) which is authorised and regulated by the Financial Conduct Authority.

This document does not constitute an offer to buy or sell or a solicitation of an offer to buy securities in any company. This document is not intended for distribution to any other country where such distribution or use would be contrary to local law or regulation. Specifically, this document is not intended for general distribution in the United States or Canada.

Investing in financial markets involves a substantial degree of risk. Nothing described herein is intended to imply that an investment is “safe”, “conservative”, “risk free” or “risk averse”. This document does not consider the specific investment objective, financial situation or particular needs of any potential investor and is intended only for those investors who are capable of understanding the risk of loss of all or a substantial part of their monies. Potential investors in the UK are reminded that they will not benefit from the UK investors compensation scheme.

Nothing contained herein constitutes investment, legal, tax or other advice nor is to be relied upon in making an investment or other decision. No recommendation is made positive or otherwise, regarding individual securities or investments mentioned herein. Any summary list of risk factors does not purport to be a complete enumeration or explanation of the risks involved in an investment in short and leveraged products. Prospective clients must consult with their own legal, tax and financial advisers before deciding to invest.

This document contains the opinions of the author and such opinions are subject to change without notice. The source of data is Graniteshares unless otherwise stated. No guarantee is made to the accuracy of the information provided which has been obtained from sources believed to be reliable. This document and the information contained herein is intended only for the use of persons (or entities they represent) to whom it has been provided.

Risk Factors

An investment in a GraniteShares short and leveraged exchange traded product (“**ETP**”) may not be suitable for all investors. They are intended for investors who wish to take a very short term view on the underlying asset and are not intended as buy and hold investments.

Performance and capital loss: Past performance is not a reliable indicator of future results. The value of an investment may go down as well as up and can result in losses, up and including a total loss of the amount initially invested.

Generic risks: Investments in ETPs involve numerous risks including, among others, company risks, general market risks, credit risks, foreign exchange risks, interest rate risks, geopolitical risks and liquidity risks.

Specific product risks: The Index is constructed to track the performance of an increased (leveraged) and/or short exposure to the underlying asset. A fall (or rise where short and leveraged exposure) in value of the underlying asset can result in a greater reduction in the level of the Index. The Index is designed to

do this on a daily basis only which should not be equated with seeking a leveraged position for periods longer than a day. The ETP's performance over periods longer than one day will not be correlated or symmetrical with the returns of the underlying asset. Potential investors should refer to the section entitled "Risk Factors" and "Economic Overview of the ETP Securities" in the Prospectus relating to the GraniteShares ETPs for further details of these and other risks associated with an investment in short and leveraged ETPs and consult their financial advisers as needed.

Counterparty risk: An investment in a GraniteShares short and leveraged ETP involves counterparty risk. GraniteShares Financial plc has entered into a Swap Agreement with a counterparty, Natixis, that is backed with collateral. Failure of the counterparty to make payments may result in an investment in an ETP suffering a loss.
